

# Haniye Shakibayi Senobari

Istanbul, Türkiye | haniye.sh@email.com | linkedin.com/in/haniye

## PROFESSIONAL SUMMARY

---

Highly skilled Master's degree holder with expertise in Artificial Intelligence, offering strong Python programming skills and experience with Hidden Markov Models, Generative AI, and Vector Databases. Proven track record of developing and deploying automated trading algorithms and computer vision applications. Possesses a solid foundation in machine learning and data processing, with a strong ability to communicate technical concepts to non-technical stakeholders.

## CORE COMPETENCIES

---

- Semantic Data Processing
- Python
- Hidden Markov Models (HMM)
- Pine Script
- MQL5
- YOLO (Object Detection)
- Generative AI
- Vector Databases (Qdrant)
- Gauss-Newton
- Line Search
- Multivariable Calculus
- 2D geometric transformations

## RELEVANT PROJECTS & RESEARCH

---

### Cognitive Safety Agent & Computer Vision

- Analyzed homography and visual tracking for computer vision applications.
- Implemented YOLO-based models and integrated them with Qdrant for efficient RAG-based data retrieval.

### Financial Market Regime Detection

- Developed, backtested, and debugged automated trading algorithms for XAUUSD and BTCUSD.
- Applied Hidden Markov Models to identify market stress and regime switching.

## EDUCATION

---

### Master of Science in Artificial Intelligence

Bahcesehir University, Istanbul, Turkiye - GPA: 3.50 | Thesis Focus: Uncertainty-aware few-shot user adaptation for multimodal intent recognition and Hidden Markov Models (HMM) for market regimes.
